Technical data 25

The future of the sea starts here

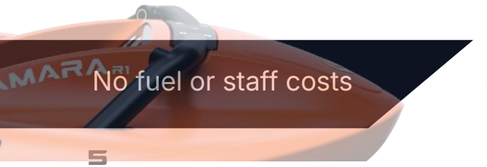

Crafted to the extraordinary

MARINE PERFORMANCE

LIVES, THE PLANET AND COSTS.

No human lives are at risk

Free of emissions and waste

No fuel or staff costs

TRADITIONAL RESCUE METHODS

Two people drown in the sea every 5 minutes

Traditional rescue devices are large and heavy

Slow start-up

Reliable

Electric

Safety

AMARA R1

AMARA R1 is a rescue device created with one clear purpose: to save lives. Its design combines propulsion, flotation, remote operation and manual use in a compact solution developed for professional maritime rescue.

Manual control mode

Radio control mode

Seamless connection. Total control

THE REMOTE CONTROL

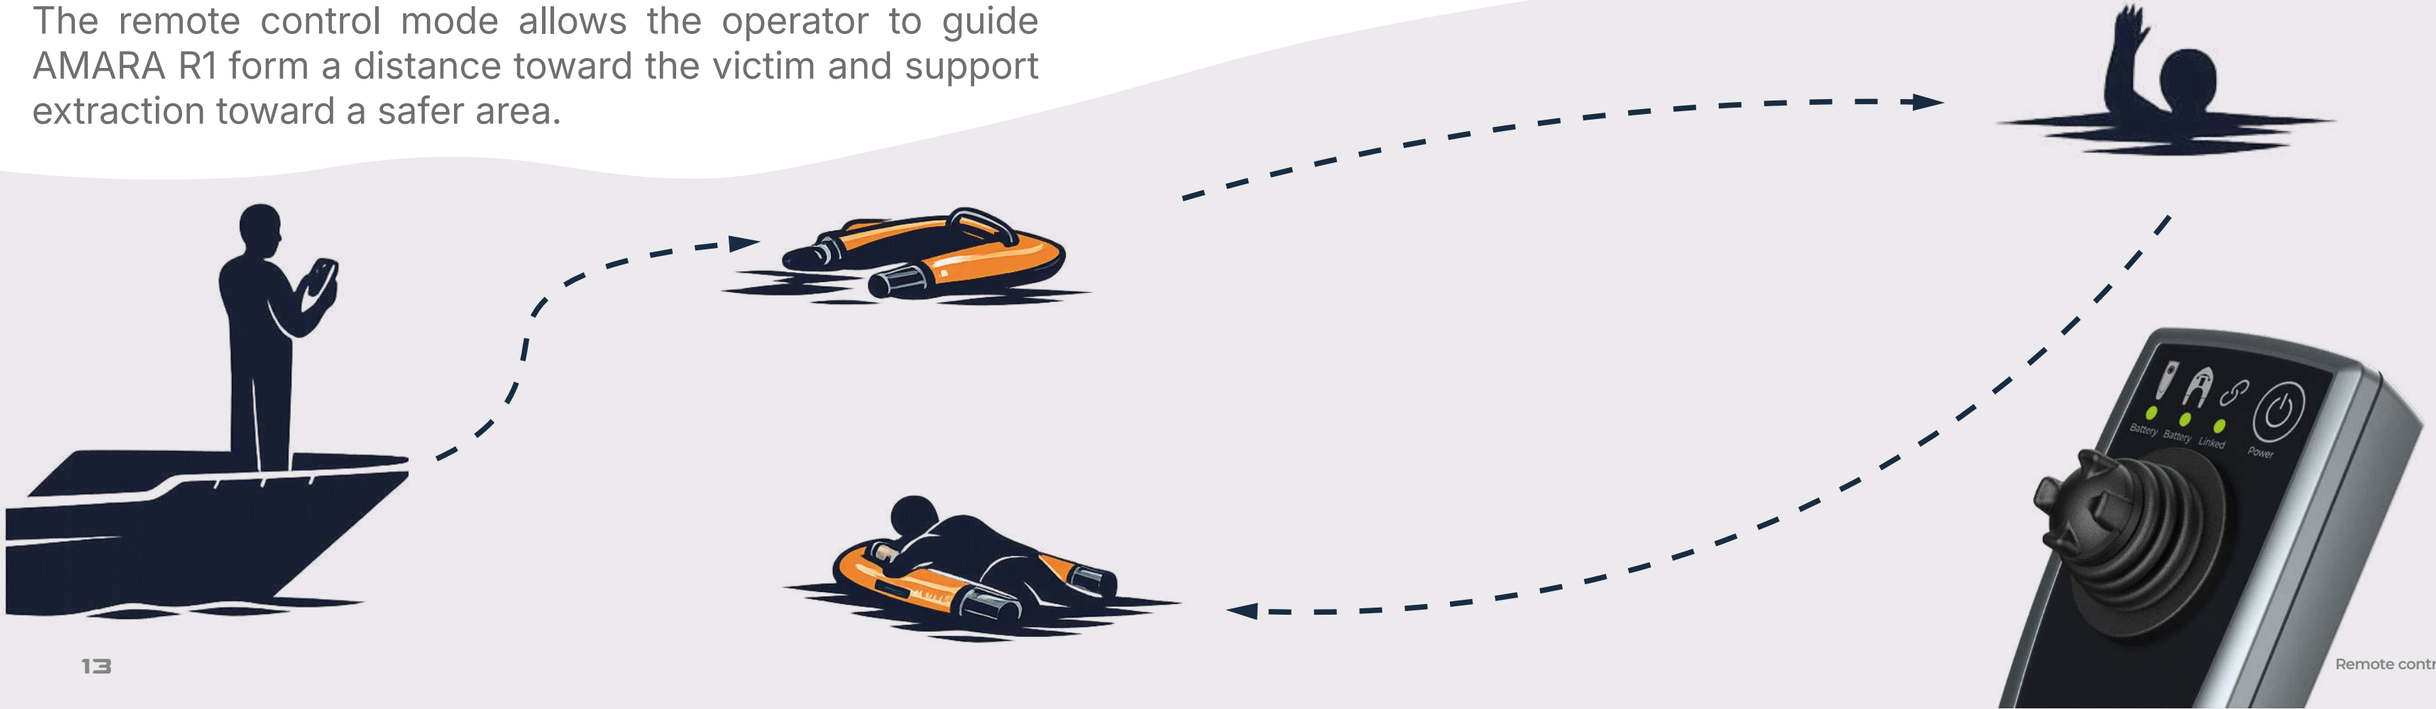

Precision control designed to keep you connected

The Amara R1 controller is designed for intuitive, reliable, and precise operation of your aquatic device.

Equipped with an LED display, it provides real-time updates on the battery status of both the controller and the device, as well as the signal range between them. This ensures you're always informed about the status of your equipment, allowing for smooth and uninterrupted operation.

REMOTE CONTROL

The remote control mode allows the operator to guide AMARA R1 form a distance toward the victim and support extraction toward a safer area.

Total control

MANUAL CONTROL MODE

Engineered for power and precision.

Driving the R1 from the central handle gives you direct and immediate control over navigation. Simply press the throttle button to feel the power.

MANUAL CONTROL MODE

Manual mode enables direct activation of the device without the remote control. It allows a rescuer to use the AMARA R1 for autopropulsion from its central handle.

Universal accessory tailored to you

ACCESSORY HOLDER

Designed to adapt to your needs and elevate every experience

Our cockpit features a built-in universal 1/4"-20 thread mount, allowing you to attach a GoPro or other compatible accessories, such as lights, phone holders, or walkie-talkies.

Capture every moment from your own perspective — hands-free, stable, and perfectly integrated into the design.

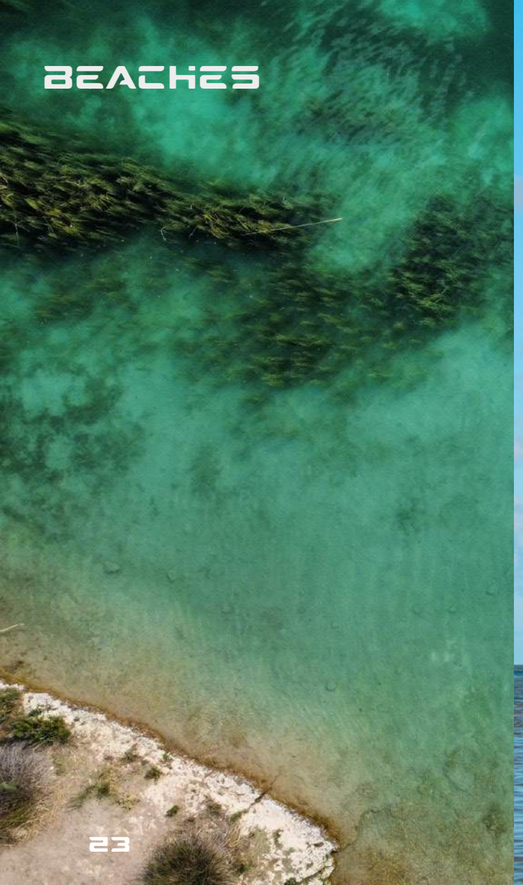

Crafted to the extraordinary

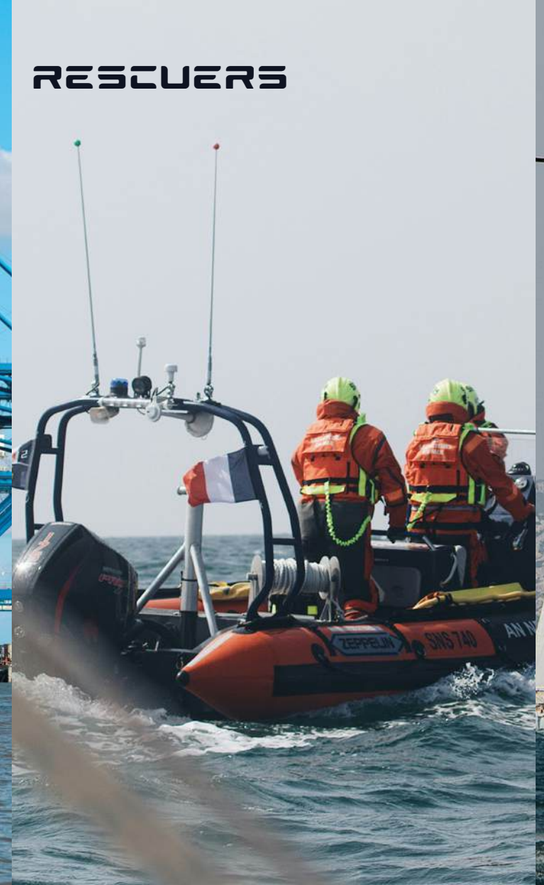

WHY CHOOSE US?

6 REASONS TO CHOOSE US

1. Made in Europe. No waiting for replacement parts or repairs (CE-certificated).
2. Manual and radio-controlled modes
3. Battery monitoring via smartphone
4. Diagnostics and error reporting app
5. Easy maintenance and remote or on-site support.
6. All devices are submerged for 10 hours before each shipment to ensure water-tightness and reliability.

Amara R1 Technical data

Weight	17kg
Dimensions	1200mm x 850mm x 220mm
Speed	From 7 km/h to 15 km/h*
Autonomy (max. speed)	25 minutes**
Autonomy (normal use)	75 minutes
Charge	100-240 VAC/ 50-60 Hz
Reach range	2.4 GHz / 250m***
Battery	50.4v. Lithium Ion
Connectivity	Bluetooth
Charge time	2 hours
Stand-By autonomy	More than 100 days
Mobile APP	Maintenance and updates

* 7 km/h in manual mode and 15 km/h in radio control based on favourable sea.

** This autonomy estimate is at maximum continious power.

*** This distance is measured in favourable conditions at sea level with 5 meters high.
